# ThinLinc®

CENDIO.

## World leader in advanced graphics with thin clients

You can now run your graphic-intensive applications on the server!

*That which has previously required an expensive workstation, can now operate with a cheap and simple thin client.*

Support for graphic-intensive OpenGL-based  
3D CAD/CAE/FEM/CFD in mixed Windows,  
Linux and Unix environments

World leading Open Source  
thin client Virtualization

Cendio®

# ThinLinc®

Cendio®  
ThinLinc®

CENDIO®

ThinLinc reduces the problems associated with different tools requiring different operating systems. That which has previously demanded special workstations or forcing developers to fill their desk with different computers can now be performed from a single desktop environment. Visualization software from Linux systems, analytic tools from the Unix-based computers and design tools from Windows can now coexist in ThinLinc, the environment developed by Cendio.
